

# HOW

# totem FITS INTO

# MTSS

## TIER 1 UNIVERSAL SUPPORTS

Totem professional learning programs are designed to be "stacked" (aligned) within an MTSS framework.

- Happy Class trains teachers on evidence-based strategies for ALL students (Tier 1)
- Chillax trains teachers on a comprehensive SEL curriculum across all the Tiers (1,2,3)
- GPS is a parent outreach program designed to include parents on general SEL approaches
- Bullyology provides systemic supports to prevent bullying AND build resilience in students.
- Parapro trains staff on the basics of supporting ALL students ALL the time.

## TIER 2 TARGETED SUPPORTS

Some students need more intensive focus and support from school teams. These programs have been custom built to train teachers on how to support students in more intensive supports:

- Happy Class provides teachers with tools to support students with more focused intervention.
- Chillax creates deeper learning in SEL skills through small group instruction
- Bullyology creates deeper learning in resiliency skills through small group instruction
- ASPEN is our flagship program designed to build what matters most for students exhibiting difficult behaviors: Meaningful connection.

## TIER 3 INDIVIDUALIZED SUPPORTS

Some students will require intensive and individualized supports. These Totem PD programs train teams for the long haul in supporting individual needs of students.

- ASPEN was built for these supports, pure and simple.
- Chillax has many levels of support-even for an individual student.
- IEP Zen helps teachers and parents prepare for the IEP process (if and when it becomes a part of the plan).

## (PROFESSIONAL LEARNING: STACKED)

Educators have one priceless commodity: **Time.**

Totem PD understands how implementing an MTSS framework takes a lot of time (3-5 years, actually).

So, we want your teams to have access to professional learning related to authentic MTSS implementation 24-7.

The cliché is that "it takes a village" to raise a child. We've adapted the cliché to include "it takes a village AND access to online tools" to raise a child.

We're happy to be part of your village AND to provide you with access to online tools!

Join us, won't you?
